

GRID Felt Panels

GRID – Making Space Work
Adaptable. Durable. Elegant.

Felt panels are now available as a new component in the GRID collection. These aesthetically pleasing felt panels can be used as decorative pin boards or as acoustic panels. GRID's felt panels are made with sound absorbing buzzskin and are available in 3 colours: off-white, stone grey and anthracite. With the release of yet another elegant and durable component to the range, GRID further strengthens its concept as a highly adaptable architectural system perfect for office spaces. GRID was designed to give users freedom to create multifunctional furniture whereby one module can be multiplied to form a well-defined structure with the dimensions and functionality required.
