

GRID Top Boxes

GRID – Making Space Work
Adaptable. Durable. Elegant.

Top boxes are the latest product release in GRID's modular interior system. As with all GRID components, GRID's new top boxes are multifunctional: a planter for luscious green life, a space for product samples or an elegant display case. Top boxes can be positioned singularly upon just one GRID module or be integrated into a larger GRID structure. GRID gives users the freedom to design furniture with the dimensions and functionality desired. The lightweight GRID modules are the building blocks of the system and can be connected to one or hundreds of other GRID modules to create whatever structure is needed: a reception desk, a room divider, a display unit, a bench, a wall or a storage unit. When a fresh look is needed, the durable GRID modules can be easily disconnected and re-assembled into new designs.
